

# What time is it?

## The time

### a.m. & p.m.

The 12-hour clock is a time conversion convention in which the 24 hours of the day are divided into two periods called ante meridiem (a.m., English: "before mid day") and post meridiem (p.m., English: "after mid day"). Each period consists of 12 hours numbered: 12 (acting as zero)
