

1) Převeď zlomek na desetinné číslo

$$\frac{5}{10} = 0,5$$

$$\frac{30}{100} =$$

$$\frac{92}{100} =$$

$$\frac{3}{10} =$$

$$\frac{1}{100} =$$

$$\frac{13}{10} =$$

2) Sčítej a odčítej zlomky

$$\frac{4}{9} + \frac{3}{9} =$$

$$\frac{85}{10} - \frac{67}{10} =$$

$$1 - \frac{3}{4} = \frac{4}{4} - \frac{3}{4} =$$

$$\frac{67}{100} + \frac{58}{100} =$$

$$\frac{6}{8} - \frac{5}{8} =$$

$$1 - \frac{2}{7} =$$

$$\frac{4}{8} + \frac{2}{8} =$$

$$\frac{8}{10} - \frac{3}{10} =$$

$$1 - \frac{3}{8} =$$

3) Zaokrouhli

a) na desetiny

$$1,87 =$$

$$7,82 =$$

$$39,98 =$$

b) na jednotky

$$0,4 =$$

$$12,02 =$$

$$3,39 =$$

4) Vypočítej

$$7,25 \cdot 10 =$$

$$57,52 \cdot 100 =$$

$$1,05 \cdot 100 =$$

$$52,6 \cdot 10 =$$

$$8,05 \cdot 100 =$$

$$63,7 : 10 =$$

$$125,7 : 100 =$$

$$38 : 100 =$$

$$975 : 100 =$$

$$368,7 : 100 =$$
